

Data Sharing Policy

Complying with the requirements of ICMJE' Data Sharing Statement (<https://www.icmje.org/icmje-recommendations.pdf>), Chinese Journal of Cancer Research (CJCR) strongly encourages that all research data on which the conclusions of the paper rely should be available to readers. CJCR establishes a Featured Data Community in Science DB and recommends authors to deposit their datasets in <https://www.scidb.cn/c/CJCR>, or other publicly available repositories.

Questions	Authors' response
Manuscript Title	Development and Validation of Neutrophil Percentage to Albumin Ratio Based Nomogram for Predicting Survival in Patients with Locally Advanced Gastric Cancer
First Author	Shun-yu Deng, Mao-xing Liu, Fei Tan
Does your manuscript use ONLY data from a publicly available database? If "Yes," please specify the database; no additional information is needed. If "No," please complete the following questions.	No
Will the data collected for your study be made available to others? (If "No," offer context for your decision)	The de-identified datasets generated and/or analyzed during the current study are not publicly available to protect patient privacy but are available from the corresponding author on reasonable request.
Which data are available?	Patient demographics, NPAR, DFS, and OS data.

Additional information about the data	To protect patient privacy, all personal identifying information has been strictly removed.
How or where can the data be obtained? (e.g., Email address, URL of CJCR's Featured Data Community in Science DB, or other repositories)	The data can be obtained by contacting the corresponding author via email.
When will data availability begin and end? (e.g., M/D/Y to M/D/Y)	Immediately following publication. No end date.
Will any supporting documents be available?	Yes
Which supporting documents are available?	The statistical analysis plan and the template of the informed consent form.
Additional information about the supporting documents	To protect patient privacy, all personal identifying information has been strictly removed.
How or where can supporting documents be obtained? (e.g., Email address, URL of CJCR's Featured Data Community in Science DB, or other repositories)	The data can be obtained by contacting the corresponding author via email.
When will supporting documents availability begin and end? (e.g., M/D/Y to M/D/Y)	Immediately following publication. No end date.
To whom will data be available?	Researchers who provide a methodologically sound proposal and wish to achieve aims specified in the approved proposal.
For what type of analysis or purpose?	For non-commercial academic validation,

	meta-analysis, or collaborative scientific research.
By what mechanism?	Data will be shared after approval of a formal request by the corresponding author and execution of a signed data access agreement.
Any other restrictions?	The shared data must not be used for any commercial purposes, and must not be shared with any third party without explicit prior written consent.
Additional information	None.
